EDUCATION

FLORIDA INSTITUTE OF TECHNOLOGY

Melbourne, Florida

Bachelor of Science

May 2023

Major in Computer Science; Minor in Philosophy

Cumulative GPA: 3.93/4.0; Dean's List 2019-2023; Outstanding Student of the Year 2023

Relevant Coursework: Data Analysis, Database, Machine Learning, Algorithms, Big Data, Probability and Statistics, Economics

WORK EXPERIENCE

CARIBBEAN AIRLINES LTD

Piarco, Trinidad

Data Scientist

Nov 2023 – Present

- Spearheaded the development and implementation of a customer segmentation model and ancillary prediction model on millions of passenger records using machine learning and high-level data analytics based on engineered behavioral and transactional features, which increased targeted marketing effectiveness and led to a rise in customer retention rates. The models insights also drove personalized service improvements, enhancing overall customer satisfaction and experience.
- Engineered and optimized scalable and dynamic ETL pipelines with Python and SQL, achieving a reduction in data processing time and ensuring data accuracy and integrity, which enhanced the reliability of business intelligence tools.
- Designed and deployed real-time, interactive dashboards and reports using Python (Matplotlib, Seaborn, Streamlit), Power BI, Excel, and SSRS, significantly enhancing stakeholder engagement, accelerating decision-making, and supporting revenue growth through improved market analysis and strategic planning.
- Partnered cross-functionally with marketing, finance, and operations teams to translate business problems into ML and statistical solutions.

Data Scientist Intern

Jul 2023 – Nov 2023

- Engineered resilient ETL processes using Python and SQL, ensuring seamless and reliable data integration into the central data warehouse. This initiative significantly enhanced data accessibility and consistency for analytical purposes.
- Leveraged advanced T-SQL querying and data wrangling skills to model data effectively, driving insights and supporting critical business functions.
- Automated various tasks and existing recurring reporting workflows by integrating APIs to enhance operational efficiency and reduce manual intervention.

FLORIDA INSTITUTE OF TECHNOLOGY

Melbourne, Florida

Project Developer and Research Assistant

Jan 2023 – May 2023

- Collaborated with PhD professors to develop an innovative code-to-requirements conversion model that streamlined the process, enabling users to go straight from code to requirements using NLP, which makes it stand out in the field.

Gym Supervisor

Oct 2021 – May 2023

- Successfully led and managed a diverse, international team of 50 individuals, resulting in a 20% increase in productivity and a 15% improvement in employee satisfaction.
- Interacted with hundreds of customers daily, maintaining a 95% customer satisfaction rate and increasing revenue by 110% through upselling techniques.

Technical Skills: Programming skills: Python, R, C, C++, Java, HTML, CSS, JavaScript, SQL, NoSQL. Direct experience handling scripting languages such as CSV, JSON. Data visualization: creating effective charts, graphs, and interactive dashboards using tools such as Matplotlib, Seaborn, Plotly, Power BI and Tableau. Big Data technologies: Hadoop, Spark, Cloud computing platform: Microsoft Azure Studio, AWS, and services like DynamoDB, EC2 and S3, and Software: experience in utilizing agile methodologies in combination with advanced tools such as Visual Studio Code, IntelliJ, Anaconda, Jupiter Notebook, Jira, Saturn Cloud, React, GitHub and BitBucket.
